

Examiner's report

Qualifications Framework

Stage 2: NI Laboratory Equipment

Written Examiner's Report May 2024

General

With only three candidates sitting in this session, any findings are statistically insignificant. Generally, what the marks reveal is that the technical aspects can be answered confidently but those requiring experience with auditing were not. There seems to be a lack of recognition that there isn't much difference between auditing in a quality assurance environment to conducting an investigation into a due diligence defence. 5WH is relevant here as in criminal investigations.
