

## Examiner's report

Qualifications Framework

Stage 2: Weights and Measures

Reflective Statement Examiner's Report May 2024

### **General**

It is pleasing to see that candidates are getting to grips with these statements. The reflections are generally more self-focussed rather than a critique of CTSI, sponsoring authority or individuals. The topic pool discussed is expending thankfully away from Dynamic Axle Weighers. Unfortunately, what some reflections depict is a low engagement with weights and measures by some authorities and these candidates are having to learn the 'hard way' rather than nurtured by experienced officers. The higher marks awarded were where candidates alluded to a road map to experience and what needs to be achieved and how.
